

SECURITYMADEIN.LU, the Cybersecurity Agency for the Luxembourg Economy and Municipalities, has been established in 2010 under the patronage of the Ministry of Economy, in partnership with SIGI and SYVICOL. We are strengthening our high performing team and, are looking for

a Software Developer / DevOps (m/f) (permanent contract, full-time)

Mission and role

- Support the development and the maintenance of specific applications related to the C3 department activities
- Maintain and support the IT infrastructure required by these applications
- Participate in the development of process automation of tools
- Support C3 business users of these applications
- Contribute to the building and the setup of new development tools and the infrastructure, in order to automate and improve development and release processes
- Participate in the incident handling involving C3 systems, and help to identify and to solve technical problems

Profile and requirements

- 2+ years of experience
- Bachelor degree or equivalent
- Knowledge of Linux, Mac, Shell scripting, Networking, Cloud, OS security, Php, a flavour of SQL (MySQL, PostgreSQL...), Node.Js, Python (Preferred frameworks : Django, Flask...)
- A "security comes first" mentality applied to DevOps principles to ensure that systems are safe and secure against cybersecurity threats
- Willing to operate in pair programming when required
- Competent in managing handling his/her own projects and reporting of activities
- Able to understand the needs of the involved stakeholders and translate them into development requirements
- Fluent in English (mandatory); French, Luxembourgish or German is considered as an advantage
- Excellent oral and written communication
- Driving license B is required

If you are interested in this profile, send your application in English, including a motivation letter, your CV and references of your expertise, specifying the job reference "C3_DevOps_2021" to hr@securitymadein.lu
